Summary

Software Engineering student at AUCA with hands-on experience in web development, AI-driven projects, and software engineering through academic initiatives and the Mastercard Foundation Innovation Center. Skilled in React, Node.js, Python, SQL, and Git, with a strong interest in building practical user-focused solutions and contributing to innovative development teams.

Experience

Software Engineering Team Member

Worked on software and AI-driven projects through AUCA and the Mastercard Foundation Innovation Center, contributing to system design, feature development, testing, documentation, and machine learning integration while collaborating with multidisciplinary teams to deliver innovative technology solutions.

Team Leader – Academic Projects

Led academic software development projects by coordinating team activities, assigning tasks, and supporting project planning, implementation, documentation, and presentations while ensuring effective collaboration and timely delivery.

Projects

Emergency Alert System (React, Node.js, Express.js)

Designed and developed a full-stack emergency communication platform for campus security and alert management.

EduStat – AI-Powered Academic Management System (Django, Python, Random Forest)

Contributed to backend development and machine learning integration for student performance prediction.

VigilPay – Customer Churn Prediction Platform (Django, Python, XGBoost)

Supported development of a business analytics platform and customer churn prediction features through the Mastercard Foundation Innovation Center.

Education

Bachelor of Information Technology in Software Engineering

Adventist University of Central Africa (AUCA), Kigali, Rwanda | 2024 – Present

Achievements

International conference speaker (GIRCA 2026) and former humanitarian volunteer with the Sudanese Red Crescent. Awarded a Certificate of Participation for scholarly excellence, research integrity, and global academic engagement.

Certifications & Licenses

Certificate of Participation – GIRCA Student Research Conference (April 2026)

Skills

Programming Languages: JavaScript, Python, SQL

Web Technologies: HTML, CSS

Frameworks & Libraries: React, Node.js

Tools: Git, GitHub

Professional Skills: Team Leadership, Project Coordination, Attention to Detail

Languages

Arabic | English
